NOLIMIT. Shape your light with a simple twist.

It is decidedly minimal (less than 2 inches square in cross-section), light, and simple. Yet NOLIMIT, designed by Felice Dittli for Regent of Basel, Switzerland, offers an expansive range of light-shaping possibilities, with easy fingertip control.

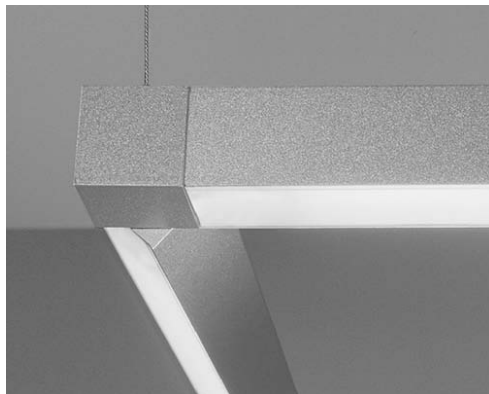

Each lighting element, containing an ultra-slim ballast and T5 or T5HO lamp shielded by a satin acrylic diffuser, can be manually rotated 360° to direct light up, down, or at any angle in between – total design freedom. NOLIMIT lighting elements feature a snap-in lens for even brightness and clean, square corners. No lighting system quite like this has ever been offered in North American markets.

NOLIMIT is available in **ADA Compliant** wall-mount configurations as well, with the same unlimited length and distribution capabilities as the suspended system.

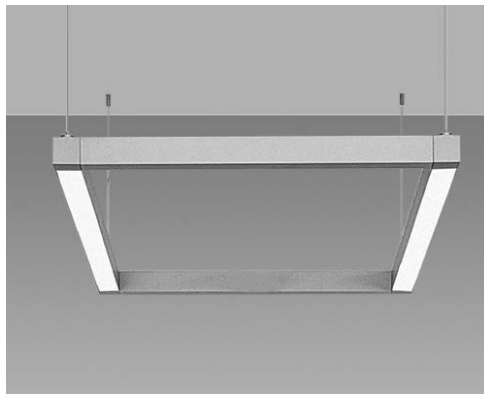

NOLIMIT is minimal, lightweight, elegant – constructed entirely of aluminum with flawless thermopainted metallic-silver finish.

Multifunction cube. Heart of the system.

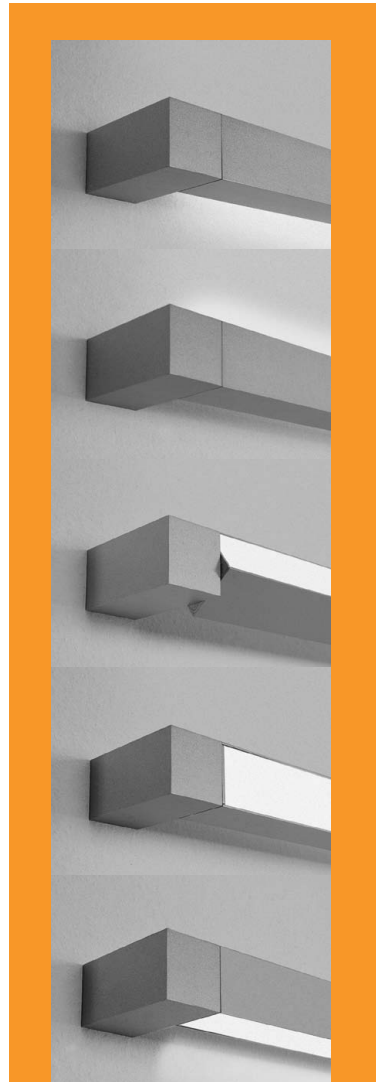

The heart of this ingenious system is a multi-function cube that connects the 4-foot lighting elements mechanically and electrically. The cube also enables the lighting elements to rotate. With it, you can extend lighting runs to virtually any length, turn corners, and create a square, U-shaped or rectangular configurations.

Rotation at the corners is limited. One lighting element must be in the 0°, 90°, 180° or 270° position to enable the other lighting element to rotate through the entire 360° range.

NOLIMIT Square is also offered as a standard configuration.

Easy manual adjustment of individual lighting elements allows you to project light in any direction, anywhere within the system, with a simple twist.

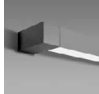

Product details.

- Body of the fixture rotates 360° allowing easy adjustment for direct, indirect, and asymmetric light distribution
- Minimal visual – less than 2 inches square in cross section
- Pendant- and wall-mounted versions
- Flush, snap-in lens for even brightness and clean, square corners
- May be individually mounted or joined together to form linear runs
- Corners are available to make right-angle shapes
- Wall-mounted fixture is **ADA Compliant**

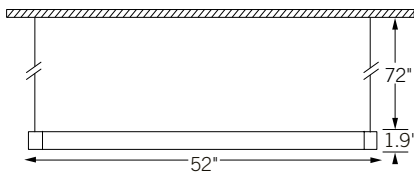

CONSTRUCTION	Fixture body is constructed of extruded aluminum. End caps are constructed of die-cast aluminum. Body of fixture rotates 360 degrees.
FINISH	Body finish is thermopainted metallic silver.
SHIELDING	Lamp is shielded by a satin-acrylic diffuser.
ELECTRICAL	120V or 277V. Integral electronic ballast.
MOUNTING	Corners and joiners are available. NOLIMIT Pendant fixtures are supplied with 72-inch fully adjustable aircraft cable. NOLIMIT Surface fixtures are supplied with a custom Énergie junction box that can be shipped ahead of fixture.

See product specification sheets at www.energielighting.com for complete details.
