

Installation Instructions

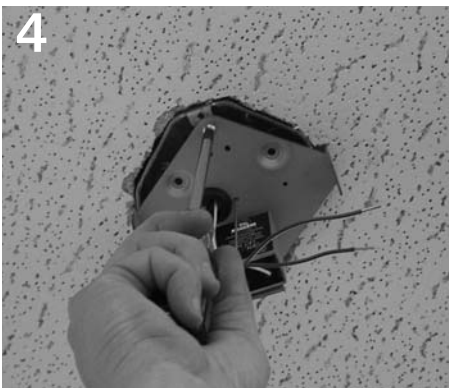

1
Lace aircraft suspension cable through mounting plate. Cable swedge should be above the mounting plate when finished.

2
Install octagonal junction box (not provided) into ceiling.

3
Make electrical connection between the mounting plate transformer and junction box.

4
Secure mounting plate to junction box with two screws.

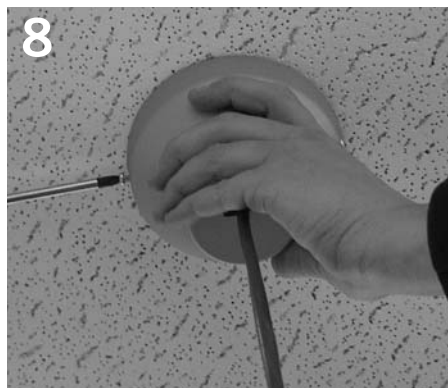

5
Cut power cord to desired length.

6
Slide power cord and suspension cable through fixture canopy. Secure cord in canopy with provided strain relief.

7
Make electrical connection between mounting plate and power cord.

8
Secure canopy to mounting plate with two (2) screws provided.

9
Slide cable into adjustable gripper.

Product to be installed by qualified electrician only.

PART # 05090702-01
